- Docker

#### Backend:

- PHP
- Node.js
- TypeScript
- Nest Js
- Hono
- Prisma orm
- Drizzle orm

#### Database:

- MongoDB
- MySQL
- PostgreSQL
- SQL Server

### WORK EXPERIENCE

**Lloyds laboratories inc** FEB 2024 - SEPT 2024  
Jr. Programmer (full stack dev)

- I maintain the web-based HR system and migrate features from VB.NET to Node.js and React.
- Conducted data correction and encoding tasks in the manufacturing system using SQL Server to maintain data accuracy and integrity.
- Worked with Express.js, Socket.IO, SQL Server, React, Redux, and Ant Design to develop and maintain web applications.

**Spedi construction inc** OCT 2022 - JAN 2023  
Web developer OJT

- As an OJT, I contributed to the further development of an existing project that manages inventory transactions for the warehouse.
- Worked with Laravel, MySQL, React, Redux, and React Bootstrap to develop and maintain web applications.

### FREELANCE PROJECTS

**Alumni System** NOV 2023 - JAN 2024

- Developed with Next.js, MySQL, Prisma, React Query, Tailwind, Shadcn UI, and Socket.IO.
- The platform connects alumni and teachers, offering communication, announcements, job postings, and profile updates, with PESO managing job opportunities for employment support.

**Pet Adoption Appointment System** SEP 2022 - NOV 2022

- Developed using Nest.js, MySQL, Prisma, React, TypeScript, and RTK Query with Redux Toolkit.
- The project aims to build a platform where users can browse pets, submit adoption requests, and schedule interviews upon request approval to complete the adoption process.
